A BILL FOR AN ACT ENTITLED: "To instate the use of water source heat pumps and geothermal heat pumps for government funded buildings"

BE ENACTED BY THE MONTANA YOUTH LEGISLATURE

NEW SECTION. **Section 1.** This act subjects new government funded buildings to install water source heat pumps and geothermal heat pumps.

NEW SECTION. **Section 2.** Enacting the new law as the section follows:

1)Every new government funded or built building should install water source heat pumps and geothermal heat pumps, which are considered to be the most energy efficient and environmentally friendly type of air conditioning and heating products. These boilers/ tower less heat pump systems use natural thermal properties of the earth to dis separate or capture heat from the water loop. Geothermic heat pumps do not need a boiler or cooling tower, they save energy costs and space. **The recommendations must be followed unless it is deemed unnecessary by the legislature. WHEREAS, they may then vote on the recommendations to prove or disprove it by a majority vote.**

NEW SECTION. **Section 3. Fiscal Note.** This act will instate a general tax

NEW SECTION. **Section 4. Effective Date** This act will be enacted in the next fiscal year
