

Dan Ralph  
Lobbyist Paper  
Butte Central

I am a concerned person wanting a health care plan for one and all. I want the government to provide a certain amount of money in order to form an institute or program in which people can apply for "Basic Health Care". People would be given care based on how much their income is and their current health care. The applicants would have to under go a health examination in order to determine if they have any short term or long term health problems. There will be a web site where the applicants will have to visit and fill out the proper information to determine the amount of health care needed. The program would then do a background check and look into the financial records to see the income of the individual. The individual must also have proof that they are a legal citizen of the United States. They will be expected to be making some form of payments to the government for their health care.

This will hopefully help the fact that today there are so many American citizens that are living now without health care. This will give everyone an opportunity to seek help and have the proper care that we all deserve.

The government is to provide the proper amount of resources and information to the general public. This may entail things such as television commercials, radio advertising, and informational web sites that are completely accessible to the general public.

Basic health care will be determined by the House and Senate committee's. This will state that any pre-existing conditions may be covered after the review of the government and officials assigned to this field. Some "Basic Health Care" options include things such as dental, eye, and prescription health care.

The funding for this operation would come from multiple sources. One of the sources would be a tax on people that make over \$750,000 a year. They would have a minor tax through their income yearly. Another would be an healthy tax on gambling in the United States. With the amount of Casinos and money that is to come through these places, there is plenty of available money for the plan. The largest of all of the sources would be a tax on traffic violations throughout the United States. This would be a double positive with the possibility that it has the chance of decreasing the amount of traffic violations and traffic related deaths
