

Concerned Citizens against everything related to or affiliated with Twilight.

I represent concerned citizens who are against Twilight. Twilight is ruining the minds of our children, and is a disgrace to American literature. Teenage girls are being brainwashed by Twilight's ridiculous fictional stories of love into creating a fake ideal of love which can only be achieved in fairy tales, or if said girl's boyfriend styles his hair with a leaf blower every morning, and wears glitter on his entire body so he sparkles in the sun. Twilight is the number one cause of depression in teenage girls as of March 2, 2010, due to the false hopes Twilight has given them about love. 98% of psychiatrists believe that Twilight causes the frontal cortex of the brain to become detached, causing bad judgment, and leading to the wearing of excess black eyeliner, hair dye, leather jump suits, and skull earrings. Twilight also promotes never going outside, which may lead to an increase in scurvy among teenage girls. Studies have also shown that Twilight may in fact transform men into women if they read it.*

A possible solution to the problem would be to hold Twilight book burnings every Sunday during church, and to utilize the "pimp-slap" method of punishment to teenage girls who are caught reading said book. If the "pimp-slap" method is not sufficient in preventing reading of the Twilight series, the violators will be tarred and feathered, and violently kicked into a pit of death. If said "kicker" yells "THIS IS REALITY" they will get bonus points. Once a "kicker" has racked up bonus points, they have the opportunity to trade them in for awesome door prizes like slinkys and yo-yos.

I will support legislation that works to oppose the reading and or existence of Twilight in America.
